SUMMARY

Full Stack Software Engineer with 3+ years of experience across Java, Spring Boot, React, Angular, and AWS cloud infrastructure. Hands-on experience owning end-to-end AWS environment setup and CI/CD pipelines for concurrent client implementations. Experience building AI-integrated applications, including a chatbot using MCP (Model Context Protocol) for real-time context-aware responses with OpenAI, and an extensible cross-database migration tool. Skilled in backend and frontend development, DevOps practices, data pipelines, and AI-assisted development workflows. Ready to relocate.

EDUCATION

University Of Mumbai

Bachelor of Engineering in Computer Science | CGPA: 9.20/10

Mumbai, Maharashtra

Aug. 2019 – May 2023

TECHNICAL SKILLS

Languages: Java 11/17, TypeScript, JavaScript, Python, SQL, HTML/CSS

Frameworks & Libraries: Spring Boot, Spring, Hibernate, JPA, Angular, ReactJS, Flask, React Hooks

Web Services & APIs: REST API, GraphQL, JSON, API Design, OpenAI API

Databases: MySQL, Oracle, ClickHouse, MongoDB, PostgreSQL, Firebase

Cloud & AWS: EC2, RDS, EBS, VPC, Subnets, Load Balancer, Route 53, S3, Lambda, IAM, CloudFormation, CodeDeploy

DevOps & CI/CD: Jenkins, Docker, Kubernetes, Git, Maven, CI/CD Pipeline Design & Deployment

Testing: JUnit, Mockito, Unit Testing, API Testing (Postman)

AI / GenAI: OpenAI API, MCP (Model Context Protocol), Ollama, GitHub Copilot, Claude, Prompt Engineering, RAG Concepts

Tools & Practices: IntelliJ IDEA, JIRA, Git, Agile/Scrum, Code Reviews, System Design, Debugging & Troubleshooting

CERTIFICATIONS

Learning Spring with Spring Boot – LinkedIn Learning (2023) | Learning SQL Programming – LinkedIn Learning (2023) | Using MongoDB with Java – LinkedIn Learning (2023)

Advance Java Programming – LinkedIn Learning (2023) | React Hooks – LinkedIn Learning (2023) | JavaScript (Basic) – HackerRank (2022) | Problem Solving (Basic) – HackerRank (2022) | Java (Basic) – HackerRank (2021)

EXPERIENCE

Consultant | Full Stack Java Developer

Percipere

April 2025 – Present

Mumbai, Maharashtra

- **Independently set up and managed complete AWS environments** (EC2, RDS, EBS, VPC, Subnets, Load Balancer, Route 53) and CI/CD deployment pipelines for client implementations, supporting up to 4 concurrent client environments
- **Designed and implemented an AI-powered chatbot** integrating a custom MCP (Model Context Protocol) server to provide real-time contextual data to OpenAI before generating responses; supports dynamic chart and graph visualizations based on user queries
- **Built an extensible database migration tool** supporting bidirectional migration between MySQL and ClickHouse, designed with a pluggable architecture to support additional database engines
- **Led a cross-functional development team** as reporting manager, collaborating directly with clients to define product features, cutting rework by about 35% and improving delivery predictability across projects
- **Engineered a scalable data quality framework** using Java and Python to process large datasets, improving data processing speed by about 60% through pipeline optimizations and cloud-backed storage
- **Containerized full-stack applications** with Docker and Kubernetes for cloud and on-prem deployments, including services for Spring Boot, Angular, and MySQL
- **Conducted code reviews and maintained technical documentation** for application components, ensuring adherence to coding standards and best practices across the team

- **Developed and implemented a visual Data Modeling tool** using Java, Spring Boot, MySQL, Angular, and GoJS, enabling drag & drop table relationships on an interactive canvas, reducing schema design time
- **Integrated ChatGPT into a code editor**, allowing users to generate SQL queries from natural language using GPT APIs and schema-aware context, accelerating query creation for non-expert users
- **Built a full-stack AIML Workbench** from scratch enabling end-to-end model lifecycle management and ML pipeline orchestration with AWS Lambda and S3, using XGBoost and Decision Tree algorithms
- **Maintained and enhanced existing application features**, troubleshooting production issues and applying regular updates while ensuring business continuity for end users
- **Automated complex ETL processes** by creating a single-click marketplace for Extraction, Transformation, and Loading workflows, reducing user workload by 80% and streamlining data operations

PROJECTS

- Natural Language to SQL Query Generator** | *Spring Boot + Ollama, MySQL* April 2025
- Developed a **Spring Boot application with Ollama LLM** to convert natural language questions into SQL queries
 - Applied **prompt engineering and query validation** to ensure accurate, secure, and business-relevant outputs
 - Automated **SQL execution and HTML result rendering**, enabling seamless AI-driven database exploration
- BrainCare Mobile App** | Course Project | *React Native, Python, TensorFlow, ML Model, MongoDB* Mar 2023
- Led a team of four overseeing the development of a **CNN-powered mobile app** in React Native to detect brain tumors from MRI scans, delivering accurate predictions with an intuitive UI
 - Integrated **location-based recommendations** for top-rated hospitals and doctors, enhancing patient accessibility to specialized healthcare
- Customer Relationship Management System** | *Java, Spring, Hibernate, MySQL* Jun 2022
- Developed a **full-stack CRM application** with Spring Boot, Hibernate, and MySQL, implementing secure JWT-based authentication and CRUD operations for customer data management
 - Built a **ReactJS single-page frontend** with efficient rendering and reusable components, enabling seamless user interaction
