SUMMARY

Full Stack Java Developer with 3 years of experience in Java, Spring Boot, Angular, AWS, and Python, with hands-on expertise building enterprise applications, AI-enabled tools, and data quality platforms processing 100K+ records daily. Open to immediate relocation to Bengaluru, Pune, or Hyderabad.

EDUCATION

University Of Mumbai

Bachelor of Engineering in Computer Science | CGPA: 9.20/10

Mumbai, Maharashtra

Aug. 2019 – May 2023

TECHNICAL SKILLS

Languages: Java 11/17, Python, Node JS, HTML/CSS, JavaScript, TypeScript, MongoDB, MySQL

Technologies/Frameworks: Angular 10+, ReactJS, Spring boot 3, Spring Web Flow, Hibernate, Flask, JUnit, AWS, Kafka, Docker, RESTful API, Maven, Kubernetes, Socket programming, MultiThreading

Tools and Libraries: Git, IntelliJ, Jenkins, JIRA, Numpy, Pandas, Mockito, JWT, GoJS, OpenAI API, Ollama Model

GenAI & Dev Tools: ChatGPT, Claude, Copilot

AWS Services: IAM(ADMIN ACCESS), VPC, EC2(LINUX/WINDOWS), S3, RDS, EBS, Cloud Formation, Lambda Functions, Route53, CodeDeploy

EXPERIENCE

Consultant | Full Stack Java Developer

Percipere

April 2025 – Present

Mumbai, Maharashtra

- **Led a cross-functional development team** as reporting manager, collaborating directly with clients to define product features, cutting rework by about 35% and improving delivery predictability across projects
- **Engineered a scalable data quality framework** using Java and Python (Pandas, Flask) to process large Excel datasets, improving data processing speed by about 60% through DataFrame optimizations and S3-backed pickle storage; exposed results via interactive dashboards for faster decision-making
- **Containerized full-stack applications** with Docker, Docker Compose, and Kubernetes for on-prem deployments, including services for Spring Boot, Angular, and MySQL; automated ETL pipelines and dashboards for business users
- **Automated complex ETL processes** by creating a single-click marketplace for Extraction, Transformation, and Loading workflows, reducing user workload by 80% and streamlining data operations.

Associate Consultant | Full Stack Java Developer

Percipere

July 2023 – April 2025

Mumbai, Maharashtra

- **Developed and implemented a visual Data Modeling tool** using Java, Spring Boot, MySQL, Angular, and GoJS, enabling drag & drop table relationships on an interactive canvas, reducing schema design time
- **Integrated ChatGPT into a code editor**, allowing users to generate SQL queries from natural language using GPT APIs and schema-aware context, accelerating query creation and lowering the learning curve for non-expert users
- **Built a full-stack AIML Workbench** from scratch enabling end-to-end model lifecycle management and ML pipeline orchestration with AWS Lambda and S3, using XGBoost and Decision Tree algorithms

PROJECTS

Natural Language to SQL Query Generator | Spring Boot + Ollama, MySQL

April 2025

- Developed a **Spring Boot application with Ollama LLM** to convert natural language questions into SQL queries
- Applied **prompt engineering and query validation** to ensure accurate, secure, and business-relevant outputs
- Automated **SQL execution and HTML result rendering**, enabling seamless AI-driven database exploration

BrainCare Mobile App | Course Project | *React Native, Python, Tensorflow, ML Model, MongoDB*

Mar 2023

- Led a team of four overseeing the development of an **CNN-powered mobile app** in React Native to detect brain tumors from MRI scans, delivering accurate predictions with an intuitive UI for result visualization
- Integrated **location-based recommendations** for top-rated hospitals and doctors, enhancing patient accessibility to specialized healthcare

Customer Relationship Management System | *Java, Spring, Hibernate, MySQL*

Jun 2022

- Developed a **full-stack CRM application** with Spring Boot, Hibernate, and MySQL, implementing secure JWT-based authentication and CRUD operations for customer data management
- Built a **ReactJS single-page frontend** with efficient rendering and reusable components, enabling seamless user interaction and optimized performance
